Projects

Portfolio Site:

- its my portfolio site that i have been developed using React JS and it shows my previous work history and experiences of languages. also you can contact me through it.

Link: <https://megersam.netlify.app>

E-commerce:

- MERN stack based e-commerce website, a fully-functional online store that allows customers to browse, search, and purchase products. The MERN stack includes four key technologies: MongoDB, Express.js, React.js, and Node.js, which work together seamlessly to create a powerful web application.

Link: <https://github.com/megersam/-ecommerce>

Airbnb Clone:

- This is a Full Stack Airbnb clone repository using Next.js 13 App Router, React, Tailwind, Prisma, MongoDB, and NextAuth. It has features such as Tailwind design, credential authentication, image upload using Cloudinary CDN, and advanced search algorithm. It also has a booking/reservation system, favorites system, and shareable URL filters. Additionally, it includes instructions on how to handle server error and loading states, create and delete properties, and handle relations between server and child components..

Link: <https://github.com/megersam/airbnb-clone>

Hotel booking UI React Js:

- Web application that enables users to search and book Hotels Online, view estimated fees ranges for places, and locate available rooms based on their search location.

Link: <https://github.com/megersam/hotelbookingMERN>

React Js Admin Dashboard:

- React.js admin dashboard a versatile and powerful tool that can be used across a range of industries, including e-commerce, social media, and more. It provides a centralized platform for managing various aspects of your business, such as user accounts, product listings, orders, and customer support.
